Re: Galaxy Groups & Clusters Observing Award

Dear Mike,

Congratulations on your achievement in observing and recording all 120 of the objects required for certification for completion of the Astronomical League's Galaxy Groups and Clusters (GGC) Observing Program. The GGC certification committee has reviewed your documentation and determined that you qualify for the Certificate of Completion and special GGC observing pin.

You have joined an elite group of advanced observers and can include this award in your quest for the title "Master Observer" for the Astronomical League Master Observer Program. You are hereby awarded Certificate Number 23 and have been added to the Awards web page: <http://www.rca-oms.org/ggcawards.htm> and will also be in the A.L. Reflector and on their awards web page. I have dated your award on the webpage from the submission form. I do apologize for the delay.

I want to personally thank you for the quality of your documentation and the effort you put forth to qualify for this award. Kudos for a job well done!

Best Regards,

A handwritten signature in blue ink that reads "Dareth Murray". The signature is fluid and cursive.
