Mike Hotka
1425 Snowberry Lane
Broomfield, CO 80020

Dear Mike:

Congratulations on being The first to complete the requirements for new Hydrogen Alpha Solar Observing Program. In recognition of your achievement, I am pleased to enclose your certificate and pin. Display them proudly. This is a significant accomplishment.

I hope the effort you put into this program has enhanced your skills, knowledge and enjoyment of astronomy. It is also my hope that this observing program has whet your appetite to continue observing the sun in hydrogen alpha light. There is always something new to watch everyday.

You can see how the sun looks in hydrogen alpha light on a daily basis by checking out the GONG Network at <http://going.nso.edu> where a global system of telescopes keeps contact vigil on the sun.

Clear Skies!

Vincent S. Foster
